## NEW ORVI GLASS SURFACES

Orvi presents the **BRISÉ** collection, rooted in age-old glass-making traditions from central India. Large sheets of coloured glass are broken into small pieces, then diligently reassembled, section by tiny section, for an overall effect that recalls the glass-tiled mosaics of Europe's medieval churches and cathedrals. Belying the precise composition and skilled craftsmanship required to create these shimmering surfaces, the resulting patterns seem almost organic in structure. From single colour designs to tone-on-tone and multi-coloured collages, each one shines with understated elegance, embellishing any space with an iridescent, kaleidoscopic quality.

## BERRYALLOC LAUNCHES NEW WATERPROOF LAMINATE FLOORBOARDS

**ETERNITY LONG** is BerryAlloc's latest collection of laminate flooring for residential and commercial environments. The range has a deep texture that replicates natural wood, complete with cracks, knots and grain patterns, and is also quick to install and easy to look after.

Available in a long floorboard format - 2038x190x12mm - Eternity Long has a class 33-AC5 wear resistance rating and offers all the benefits of a natural wood floor with none of the downsides: it is resistant to scratching, wear, impacts from dropped objects and heavy foot traffic.

The technical performance of this laminate flooring collection is further enhanced by patented **HYDROPLUS** TECHNOLOGY, which gives the floorboards a special, fully waterproof coating. This upgrades their final performance and makes them suitable for installation even in kitchens and bathrooms, without any risk of water penetration.
